### СВИДЕТЕЛЬСТВО

об аккредитации субъектов инфраструктуры поддержки малого и среднего  
предпринимательства Республики Татарстан

№ 77 от «03» августа 2016 г.

Настоящее Свидетельство удостоверяет, что

**ООО «Индустриальный парк М-7»**

(Промышленная площадка «Индустриальный парк «М-7»)

Зеленодольского муниципального района

получило государственную аккредитацию в Республике Татарстан в качестве  
**промышленной площадки**

Действительно до «03» августа 2017 г.

А.А.Зданов

The idea of the Industrial Park "M-7" creation focused on the processing of polymers, emerged in 2008. The reason for this was a public speaking of Republic's leaders at the general meeting of shareholders of "Kazanorgsintez" JSC on September 12, 2008, during which there was a task - to increase the volume of polymer processing in the Republic of Tatarstan up to 30% of the total produced in the region. The park was built in the vicinity of "Kazanorgsintez" plant, one of the largest in Russian petrochemical industries.

Direct Investments Fund – is initiator and developer of the Industrial Park "M-7" project.

M7 Industrial Park is an up-to-date industrial site located on the border between Kazan city (Moskovsky district) and Zelenodolsky region of the Republic of Tatarstan, 300 meters from M7 Volga federal highway, and in close vicinity to OAO Kazanorgsintez. The main profile of Industrial Park "M-7" is processing of polymers as the most demand industry in the Republic of Tatarstan.

In addition, the Park aims to co-operation and synergetic effect due to the presence in the same territory of different industries. In this regard, in the park also develop related industries: metalworking, woodworking, mechanical engineering, production of construction materials.

- M7 "Volga" federal highway – 300 m
- Kazan – 800 m
- International airport "Kazan" - 45 km
- Kazan river port - 23 km
- Moscow – 800 km
- Nizhny Novgorod – 390 km
- Ufa – 550 km

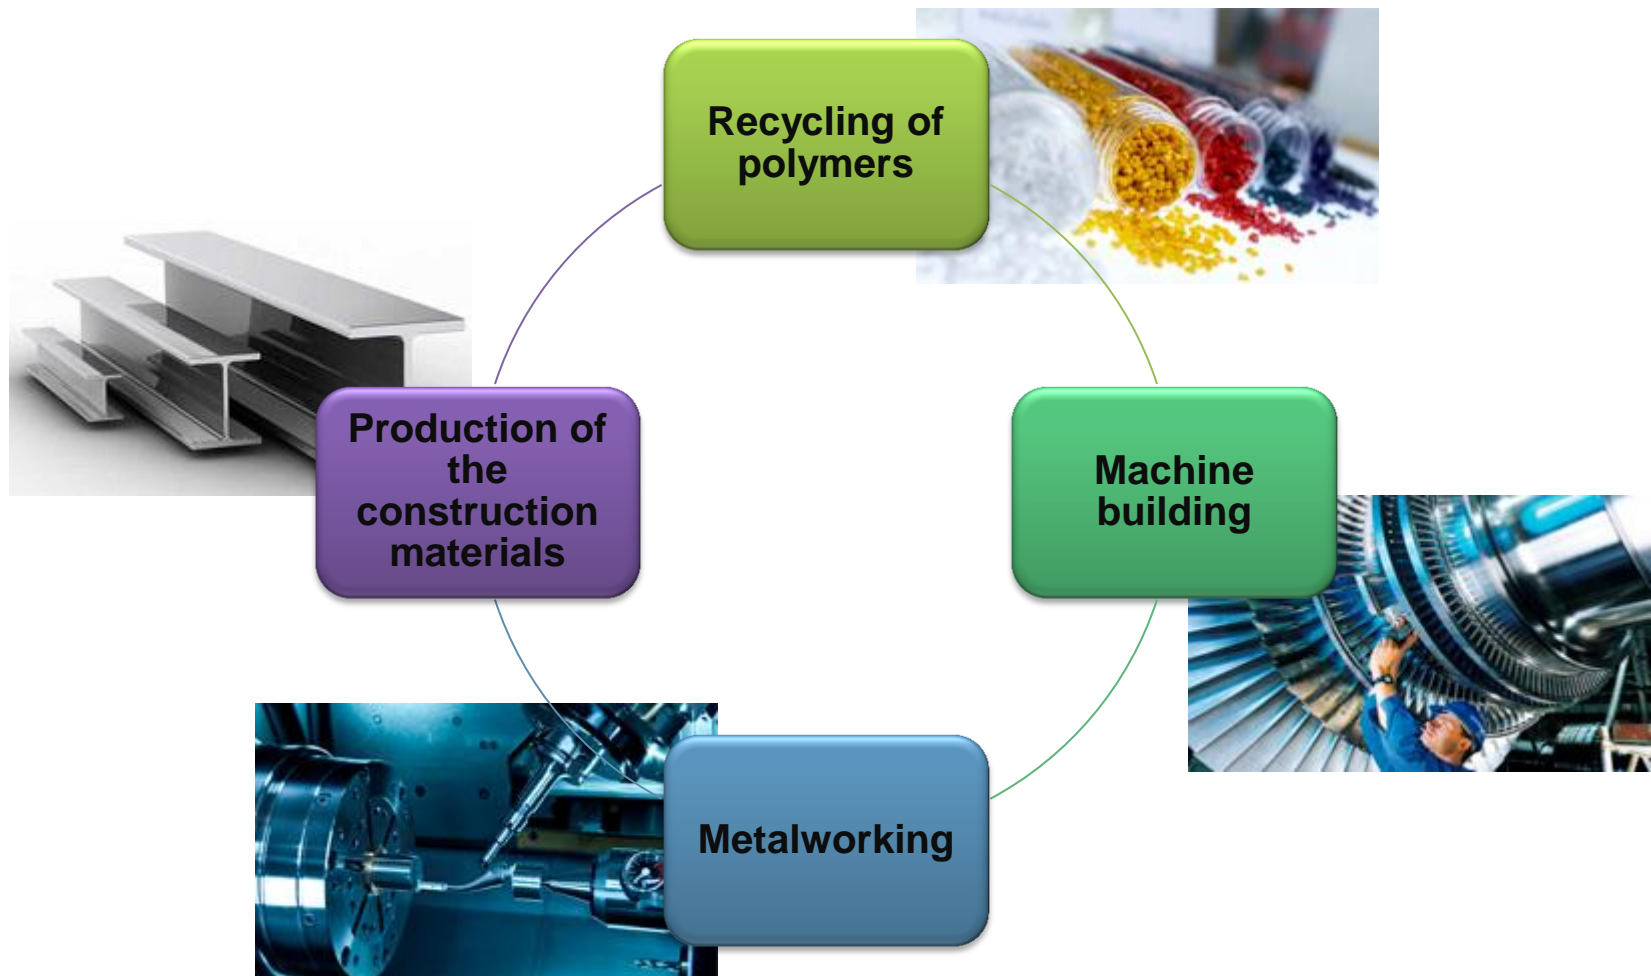

**Total area** 39,5 ha

**Busy areas** 19,5 ha

**Free territory** 13,7 ha

Engineering and the road  
Infrastructures, public areas, g  
green areas 6,3 ha

Power of water supply – 1000 m<sup>3</sup>/day

Network system

Electrical power – 8 M/W

Power of gas – 10 mln.m<sup>3</sup>/year

Formation of sites for individual requirements  
from 0.35 ha to 5 ha

Issuance of technical specifications and conclusion of  
electricity contracts

Registration of permits

Assistance in attracting financing

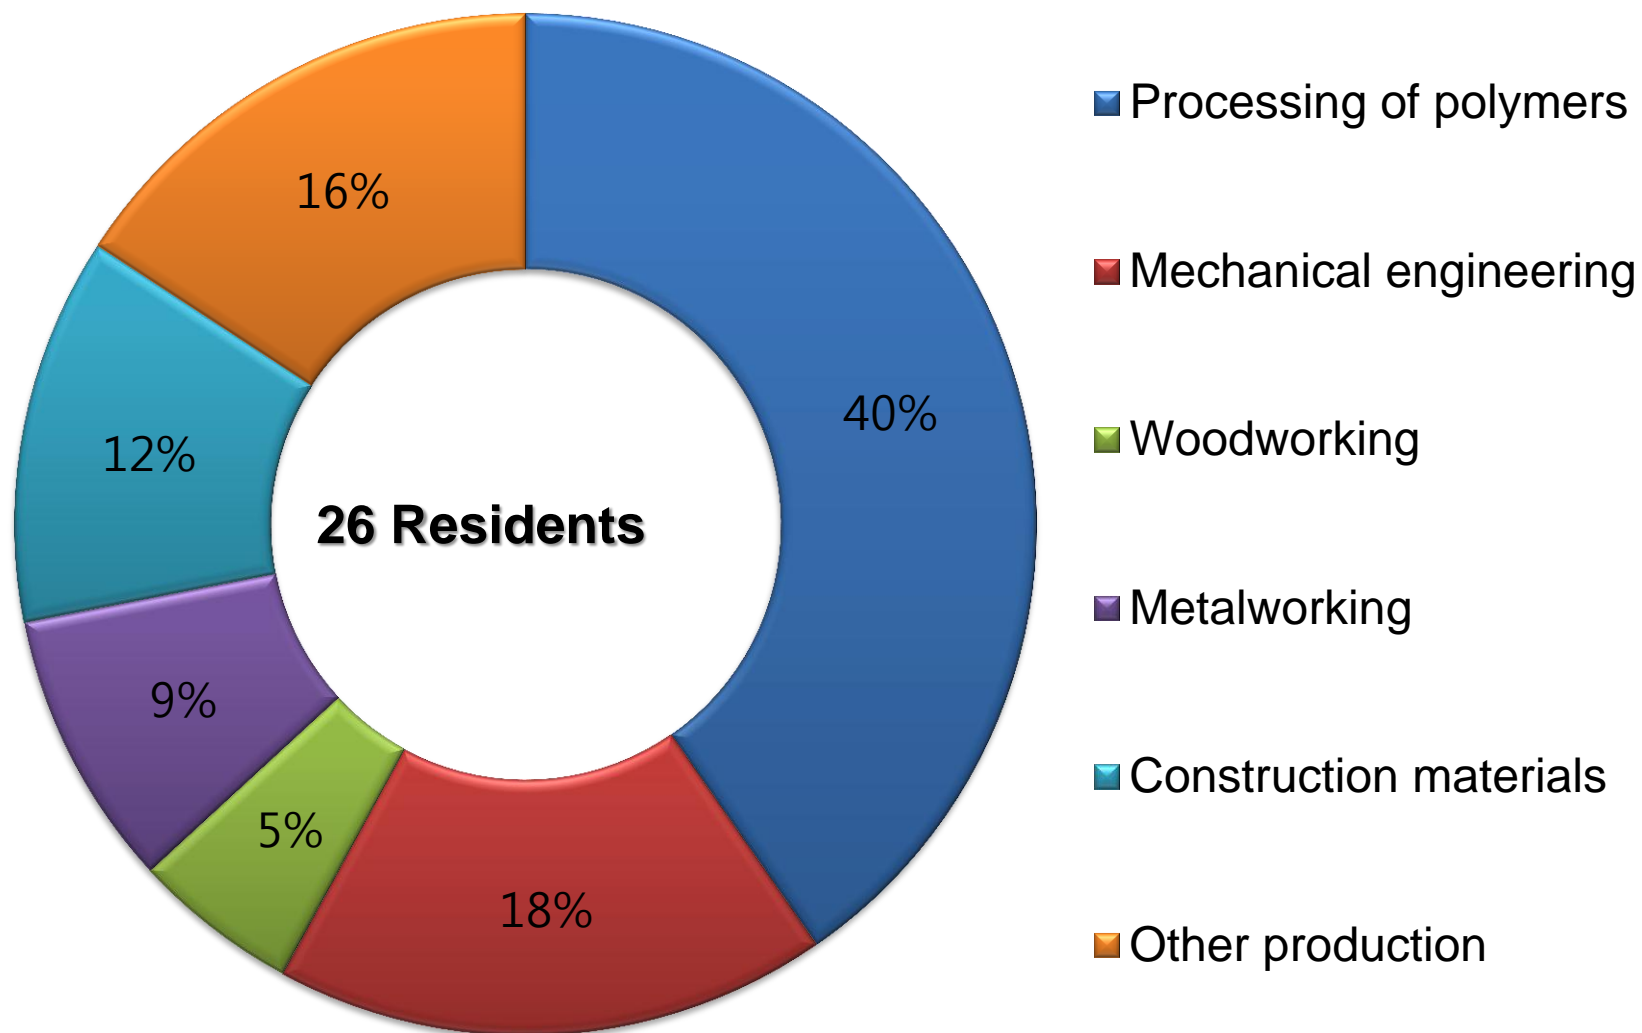

Design

Constructing

“Volzhanin” Factory is one of Russian leaders in production of welding machines (SSPT type) for butt-welding of polyethylene pipes (diameter from 40 to 1600 mm).

The equipment of “Volzhanin” is certified according to GOST and characterized by its unique reliability, mobility and universality, well construction and best prices. The Factory’s own construction bureau gives opportunity to develop any decisions from the very beginning to a finished product.

“MultiPlast” company is a high technological company, which is one of Russian Market’s leaders in production of decking from wood and plastic composites products.

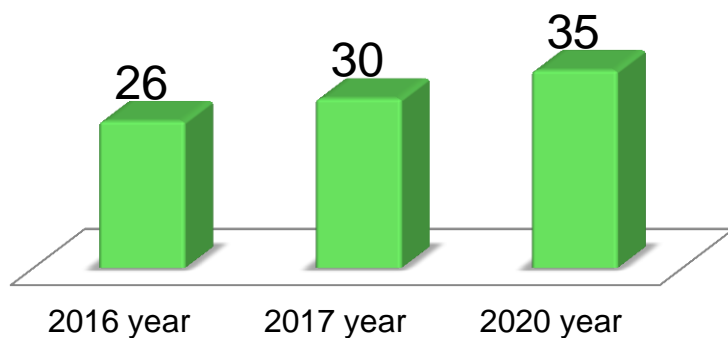

MultiDeck wood and plastic composites products are produced by equipment of Italian Company ICMA San Giorgio, which started recycling plastic in 1965 and released its first double-screw extruder.

Decking board – is a modern building material, used as flooring for terraces, verandas, piers, and berths, decks and gazebos.

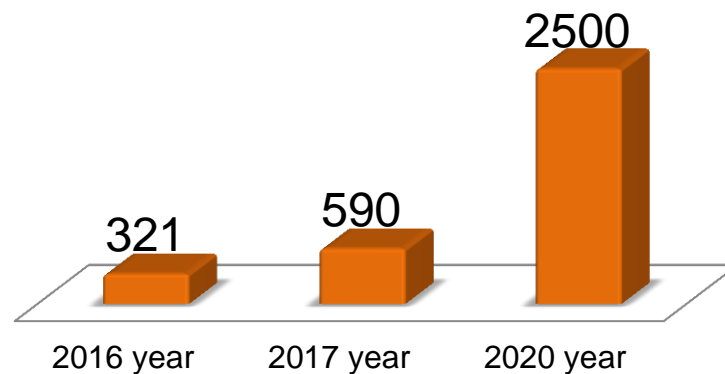

## EXPECTED INDICATOR

■ Number of residents

■ Number of workplaces

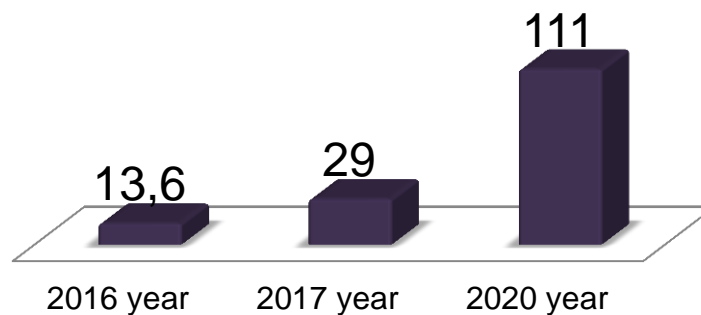

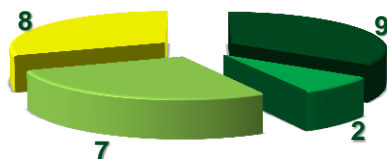

■ Functioning production

■ The area of industrial premises, thousand square meters. M.

■ Completes construction in 2016

■ It is planned to build and start production in 2017

■ Conducting design work
